

Engineered to be the Best...

Seamless commercial-grade aluminum hood is powder-coated inside and out to provide extra durability

Fixed solar panel effectively stands up to hurricane and tornadic winds

Motor isolation bracket ensures quiet motor operation

This 35 watt model's solar panel can be detached and replaced without having to replace the entire fan unit

5-Blade balanced aluminum fan

Stainless Steel wire screen keeps out critters and debris

Seamless commercial-grade aluminum flashing is powder-coated inside and out to provide extra durability

Model Size	cfm Output	Venting Capacity
16 watt	up to 1,184 cfms	up to 1,260 sf
32 watt	up to 1,560 cfms	up to 2,100 sf
35 watt	up to 1,597 cfms	up to 2,550 sf
48 watt	up to 1,881 cfms	up to 2,625 sf
65 watt	up to 2,105 cfms	up to 3,255 sf

All products are hurricane tested and approved.

Low Profile Unit
(35 watt only)

Adjustable Panel Solar Attic Fans
Also Available

Curb Mount Unit
(16, 32, 48, or 65 watt)

Gable Mount Unit
(16, 32, 48, or 65 watt)

Is Attic Heat Destroying Your Home?

You might be surprised... here's why:

Attic venting is an important aspect for maintaining a healthy and energy-efficient house. Our solar attic fan works with your existing passive attic vents to improve attic air circulation. And it does it without any power from the electrical grid.

Benefits of Attic Venting:

- ▶ **Extends the Life of your Roof...**
Heat build-up will eventually take its toll on shingles and roof underlayment. Roof replacement and repairs are expensive. Solar attic fans are a cost effective way to defer these expensive fixes.
- ▶ **Reduces the Load on your HVAC System...**
Our fans can reduce attic temperatures by up to 40 degrees. This greatly reduces the temperatures surrounding duct work and, as a result, helps shorten A/C run times—extending the life of the A/C unit.
- ▶ **Prevents Damaging Ice Damming...**
Improperly circulating attic air can create hot and cold zones. Sometimes “hot spots” form on the roof which unevenly melts rooftop snow. As the melted snow refreezes, damaging ice damming can occur on eaves and gutters.
- ▶ **Reduces Moisture Build-up in the Attic...**
Excessive moisture in the attic can cause a variety of problems including soggy insulation, wood rot, rust on metal components, and damage to items stored in the attic.
- ▶ **Increases Fresh Air Circulation...**
Probably the best way to prevent mold, mildew, and fungus on attic surfaces is to install our Solar Attic Fan.

Five Powerful Solar Attic Fan Models to Choose From...

Fixed Panel Solar Attic Fans

Ultra Low Profile Model—aesthetically pleasing, roof-hugging design

Tile Roof Model—works great with S-Tile roofs

Adjustable Panel Solar Attic Fans

Roof Mount—provides extra angle flexibility for capturing the maximum amount of sunlight

Curb Mount—same panel angle flexibility in a unit designed to work with curbs

Gable Mount Solar Attic Fans

Gable Fans—perfect for replacement of existing gable fans or when a roof mounted fan isn't desired

Solar Attic Fan Performance and Features

The adjustable panel solar attic fans are available in four different wattages: 16, 32, 48, and 65 watt models. Fully operational right from the box, our fans install easily in just under an hour. No electrician nor household electrical wiring is required. Once installed, the unit is weather tight and maintenance free. All fans are Hurricane Tested and Approved and carry our 25-Year Product Warranty on all components—including the motor!

Solar Attic Fan Options

Remote Panel—used when there is limited sunshine available for an installed fan

Fire Safety Switch

Fire Safety Switch—designed to stop the spread of fires originating in or just below the attic

Thermal Snap Switch

Thermal Snap Switch—switches on the fan when the temperature rises to 80°F and turns off the fan when the temperature falls to 70°F

Turret Extension

Flashing Skirt

Flashing Skirt and Turret Extension—designed for the special requirements of tile roofs

Garage Exhaust Kit—converts the fan into a garage venting system and can also be used in barns, sheds, or other work areas

Why Our Fans are the Best for the Price

- ▶ All hoods and flashings are made from Seamless, Commercial-grade Aluminum
- ▶ All hoods and flashings are powder-coated inside & out for superior corrosion resistance. (The interior Gable unit is made from Commercial-grade Mill-finished Aluminum.)
- ▶ All Solar Panels can be replaced without having to replace the entire unit
- ▶ All components are backed by our 25-Year, No Worry Warranty

25-Year Product Warranty

On all components including the solar panel and the motor!

HURRICANE TESTED & APPROVED

Eligible for Federal Tax Credits

We are committed to manufacturing and assembling high quality, environmentally responsible products that provide energy savings for our customers.

Our Solar Attic Fans are eligible for Federal Tax Credits as defined in The Energy Policy Act of 2005 as a Residential Photovoltaic System. In order to qualify, the unit must have been placed in service between January 1, 2009 and December 31, 2021.
